

CORETEXT™

CORETEXT™ IS A MINIMALLY MANIPULATED WHARTON'S JELLY DERIVED HUMAN TISSUE ALLOGRAFT. RICH IN CYTOKINES, GROWTH FACTORS, AND PROTEINS.

ADVANTAGES OF CORETEXT™

Coretext™ products are less invasive than adipose tissue extraction and bone marrow aspiration resulting in less time-consuming procedures, and more importantly less pain.

Coretext™ does not use any material obtained directly from the embryo or fetus. Coretext™ has higher concentrations of peptides, hyaluronic acid and growth factors when compared to amniotic fluid suspensions. Believed to be due to high concentrations of growth factors in the Umbilical Cord Matrix, also known as Wharton's Jelly, it has demonstrated strong anti-inflammatory properties and has been shown in clinical studies to prevent apoptosis.

DOCUMENTED CASE STUDIES WITH ENCOURAGING RESULTS INCLUDE:

- Muscular Tears
- Intervertebral Disc Spinal Facet Joints
- Plantar Fasciitis Bone Spurs
- Rotator Cuff Tears
- Persistent Partial Tendon Tears
- Quadriceps and Patellar Tendon Tears
- Meniscus and Cartilage Tears
- Radicular and Sacroiliac Nerves and Pinched Nerves
- Large Joints Such As The Hip, Shoulder, Knee

Coretext™ is processed from human tissue, donated following full term, c-section deliveries, in accordance with the FDA.

Coretext™ is regulated as a human cell, tissue or cellular tissue-based product (HCT/P) under 21 CFR Part 1271 and Section 361 of the Public Health Service Act.

Find out how you can use Coretext™ Flowables as an alternative to assist with musculoskeletal injuries and ailments involving tissue and joints in both acute and chronic conditions.
